

Product Data Sheet

Rosin

A flux with activators added to facilitate soldering; it is almost as active as soldering paste.
Used as a base for the flux calibration (25% solution in isopropyl alcohol).

Application:

- very good flux when soldering tin-lead alloy
- used to rub the hair of string instruments in order to increase roughness and thereby increase its adhesion to the strings
- as a binder in printing inks, which simultaneously improves its properties
- component lacquers, varnishes, soaps, lacquer, plastics, rubber

Package:

Weight	Package	Symbol
35g (metal can)	5 or 50	AGT-034
