

LUMOTAST 22, emergency stop button, 2 NC, Silver, Flat quickconnect terminal 2.8 x 0.8 tin-plated, reset by rotating, Mushroom head red, arrows red

fields of application

- > Measurement-control-regulation
- > Mechanical and system engineering
- > Vehicle construction

special features

- > Mounting hole diameter 22.3 mm
- Night design: illumination of the arrows possible
- > Low mounting depth of 17.6 mm
- > Water jet protection class IP 65 on front
- > Switching elements with silver contacts
- Contact configurations: 2 NC, 2 NC + 1 NO
- > Quick-connect terminal
- > Complies with DIN EN ISO 13850

description

The emergency stop pushbuttons comply with IEC 60 204, IEC 60 073, IEC 60 947 and VDE 0113 Part 1. They are protected against unauthorized actuation by a positively guided mechanical movement sequence in accordance with DIN EN ISO 13850. To protect against accidental actuation, a pressure point must be overcome and the pushbutton engages in the pressed position. Due to the shape of the actuating element, the emergency stop pushbutton is protected against blocking. This means that an initiated emergency stop procedure cannot be interrupted by jamming objects. See appendix for original operating instructions.

The compact LUMOTAST 22 emergency stop with quick-connect terminals is ideal wherever an emergency stop or emergency off is required and space is tight in front of or behind the front panel. This emergency stop is also available with a PCB terminal, see RAFIX 22 FS+ control component range.

D 2. Allgemeine Beschreibung und bestimmungsgemäße Verwendung

2. Augmenten beschnehoung und beschninkligsgemabe erwinding Not-Halt-Befehlsgeräte sind elektromechanische Schaltgeräte zum Schutz von Personen. Sie dienen der schneiten Abschaltung um Maschinen, Fahrzeuge und Anlagen in einen sicheren Zu-stand zu bringen, um Gefahren und Schäden für Mensch und Maschine zu vermeiden oder zu verringern.

Für die Inbetriebnahme, den Einsatz und technischen Überprüfungen gelten im speziellen folgen-de Vorschriften:

- Die Maschinenrichtlinie 2006/42/EG
- Die Sicherheitsvorschriften sowie
 Die Unfallverhütungsvorschriften / Sicherheitsregeln

Hersteller und Benutzer von Maschinen, an denen Not-Halt-Befehlsgeräte eingesetzt werden, tragen die Verantwortung für die Beachtung der Betrieban leuten gen, wie auch für die Einhaltung der für sie geltenden Sicherheitsvorschriften und -regeln.

Für den Einbau und Betrieb von Not-Halt-Befehlsgeräten müssen zur bestimmungsgemäßen

... www.enuew una betrieb von Not-Halt-Befehlsgeräten müssen zur bestimmungsgemäßen Verwendung folgende Anforderungen beachtet und eine Gefahrenbewertung durchgeführt werden:

- EN ISO 13849-1:2015 - EN ISO 13850:2008 - EN 60204-1/A1:2009 EN ISO 13849-2:2012

(GB) 2. General description and intended use

EMERGENCY STOP control units are electromechanical switching devices designed to protect persons. They are used for instant disconnection to achieve a safe status of machines, vehicles or

other equipment in order to avoid or reduce risks or damage to man and machine. The following standards and regulations apply to their start-up, use and technical inspections, without limitation: - Machinery Directive 2006/42/EC

- Safety standards
- Accident prevention regulations / rules for safety

Manufacturers and users of machines provided with EMERGENCY STOP control units are respon sible for ensuring that the operating instructions are observed and the applicable safety standards

```
and rules complied with.
```

For the installation and operation of EMERGENCY STOP control devices in line with the intended Pointerinstanation and operation of Enversion 2010 Control control devices in the wall the intended use, the following requirements must be observed and a risk assessment must be performed: - EN ISO 13849-1:2015 - EN ISO 13850:2008 - EN ISO 13849-2:2012 - EN 60204-1/A1:2009
