

FLEXIBLE LED STRIP - BLUE - 300 LEDs - 5m - 12V

Our basic LED strips are quality products for a nice price. The LEDs have an average output level and are ideally used as accent or ambient lighting in your living room. Designed for occasional use, we do not recommend using them 24/7.

Features

- usage: indoor
- application: decoration, illumination, signalisation
- fixation: 3M adhesive tape
- flexible PCB (white)
- contains 300 LEDs
- optional accessories:
 - optional power supply: [Switching industrial power supplies, LED power supplies - Aluminium](#)
 - optional controllers & LED strip dimmer: [LED controllers and - dimmers](#)
 - optional connectors: [connection wires](#)
 - optional cable: [CHLWIRE](#)
- [installation guide](#)

Specifications

- IP rating: IP61
- coating: epoxy
- colour: blue
- wavelength: 465 - 475nm
- luminous flux: -
- LED type: 3528
- viewing angle: 120°
- common anode:
 - black wire: ground
 - red wire: 12VDC
- power consumption: 17W
- current: 1.4A
- dimensions: 5m x 8mm
- LED spacing: 16.5mm
- can be cut every: 3 LEDs (5cm)
- operation temperature: -10°C ~ +50°C
