

WINDING WIRE Ø0.8mm - 22m - 0.75 ohm – WIK08N

This enamelled solderable soft copper wire is used to wind coils or transformers and is supplied on plastic bobbins. Winding wire is available in a thickness varying from 0.1 to 1.5mm. The length of the wire depends on its thickness.

Specifications

- Ø wire: 0.8mm
- wire length: 22m
- bobbin dimensions (mm):
 - A: 65
 - B: 35
- weight: 100g
- resistance / bobbin: 0.75 ohm
