

# UNIVERSAL TEMPERATURE SENSOR – VM132

## Features

- applications:
  - measure indoor and outdoor temperatures
  - monitor heating and/or cooling of rooms, equipment, etc...
  - monitor temperatures in processes
  - put a temperature readout on your website
  - check your pools temperature...

## Specifications

- range: -20°C (-4°F)... +70°C (+158°F)
- output: 0..20mA current loop
- output voltage compliance: 10V
- one single adjustment
- 3-wire system (GND, +V and OUT)
- power supply:
  - 12VDC for 0..5V OUT
  - 15VDC for 0..10V OUT
- current consumption: 30mA max.
- dimensions: 55x35x15mm

## Extras

- **\* optional**

BIG digital clock [K8089](#)
