

3 IN 1 ALL TERRAIN ROBOT – KSR11

A series of Robot Kits for the future engineer. Build this kit and find out how much fun electronics & mechanics can be! The three-in-one All Terrain Robot is a multi-function tracked mobile robot. Use different track modules to transform your robot into 3 amazing models: Forklift, Rover and Gripper. The wired controller commands the robot to make it move forward, backward, turn, grip or lift.
